

## ENVIRONMENTAL RESPONSIBILITY

### REDUCING EMISSIONS

#### INTRODUCTION

**At Emtelle, we are committed to creating innovative products and serving our customers in the best possible way. We apply that same commitment to how we approach our environmental responsibility.**

As a global company, we appreciate that we must look after our planet. We work tirelessly to reduce our impact on climate change by researching into new, more environmentally friendly materials, reducing our waste, sustaining resources and operating as a fair employer and partner. We call this the **Emtelle Sustainability Plan**.

As part of this plan, we are committed to reducing emissions.

#### **Energy use in factories**

In 2014, we reviewed energy usage in all our factories. Based on these reviews, we are developing plans to improve our factories' energy efficiency by the end of 2019.

#### **Energy use in offices**

In 2014, we reviewed energy usage in all our offices. Based on these reviews, we are developing plans to improve our offices' energy efficiency by the end of 2019.

#### **Kilowatt challenge**

In 2014, we introduced a "Kilowatt Challenge" to encourage and reward all factory and office sites to reduce electricity consumption.

#### **Business Travel**

We are committed to video and web conferencing where possible, in order to reduce un-necessary business travel by the end of 2016.

#### **Compressed Air Efficiency**

We are reviewing all production sites' compressed air efficiency and leakage to reduce production related greenhouse gas emissions by 20% by 2019.

#### **Green Company Car Policy**

We plan to introduce a Green Company Car Policy to reduce company car emissions to 150g CO<sub>2</sub> / km by the end of 2016.

#### **On-site renewables**

We are reviewing the potential for on-site renewable energy.

#### **Carbon offset policy**

We are reviewing the potential of introducing an Emtelle Carbon Offsetting Policy in order to neutralise carbon emissions by Q2 2015.

**ENGAGE. LISTEN. INNOVATE. DELIVER.**
