

## ENVIRONMENTAL RESPONSIBILITY

### IMPROVE RESOURCE SUSTAINABILITY

#### INTRODUCTION

**At Ementelle, we are committed to creating innovative products and serving our customers in the best possible way. We apply that same commitment to how we approach our environmental responsibility.**

As a global company, we appreciate that we must look after our planet. We work tirelessly to reduce our impact on climate change by researching into new, more environmentally friendly materials, reducing our waste, sustaining resources and operating as a fair employer and partner. We call this the **Ementelle Sustainability Plan**.

As part of this plan, we are committed to improving our resource sustainability

#### **Low Weight Products**

We are reviewing the potential to develop lower weight products by the end of 2015.

#### **Changeover Efficiency**

We are committed to reducing material wastage at product changeovers in order to reduce scrap material by 20% by the end of 2015.

#### **Continuous Production**

We are developing plans to introduce continuous production to some factory lines by the end of 2015. This will reduce stop-start wastage by 20%.

#### **Inks and Solvents**

We are reviewing alternative methods to reduce the use of inks and solvents by 40%.

#### **Water Usage**

We are reviewing the water usage in all offices and factories by the end of 2015. We are installing grey water systems by the end of 2017 in order to reduce water usage.

#### **General Chemical Policy**

We are updating our Chemical and Environmental Policy towards colorant suppliers, taking into account EU legislation including REACH and ROHS.

ENGAGE. LISTEN. INNOVATE. DELIVER.
