

EMTELLE

TOGETHER EVERYTHING CONNECTS

DATA CENTER SOLUTIONS

Emtelle's high-performance fiber and ducting solutions ensure uninterrupted connectivity for mission-critical data center operations. Designed for rapid deployment, easy scalability, and minimal operational costs, our future-proof passive infrastructure materials ensure optimal performance and reliability.

Trusted Partner To Leading Data Center Operators Worldwide.
Together, Everything Connects

BUILDING FUTURE-PROOF DATA CENTERS

The demand for data transfer and storage has significantly grown over the past decade. Data centers are designed and developed as mission-critical facilities worldwide and can connect consumers and business providers through high-speed fiber optic cables. Emtelle delivers robust, scalable cabling and ducting infrastructure designed for efficiency, flexibility, and ease of management.

WHY CHOOSE EMTELLE'S SOLUTIONS

TRUSTED PROVIDER

Innovative solutions trusted by industry-leading global data center operators.

INDUSTRY EXPERTISE

Emtelle's deep understanding of industry requirements allows us to provide tailored solutions and support that address your unique needs, ensuring optimal savings, performance and reliability.

GLOBAL REACH

Global supply chain partner, with manufacturing sites in the USA, UK, Germany, Denmark, and UAE.

TRAINING AND SUPPORT

Emtelle goes beyond simply providing products; we offer comprehensive training and on-site support to contractors. Our training programs equip your teams to deploy and manage Emtelle's solutions.

KEY OFFERINGS

Fire Safety Compliance

Emtelle has a range of solutions that meet with the strict fire safety requirements of both Plenum and Riser criteria. This ensures that they meet with stringent fire safety requirements, maintaining safety standards inside data centers.

Future-proof & Scalable Design

Our solutions are engineered with future capacity in mind. This ensures that data center operators can easily adapt and scale, whilst maximizing fiber density within standard equipment footprints, without the need for significant overhauls and costly downtime

Microduct Solutions for Indoor Applications

Emtelle's UV Stable Materials and Low Friction EM-Liner inside our microducts ensure durability, maximum installation distances and integrity of the fibers within. Our own formulated materials also meet with Plenum & Riser requirement.

Pre-installed Fiber Solutions

Simplify installation with all of the advantages of a microduct system whilst saving time and eliminating the need for fiber blowing equipment, costly risk and method assessments, allowing for increased productivity.

Pre-connectorized Fiber Solutions

Emtelle's Plug & Play fibers help to reduce installation complexities with our range of pre terminated solutions that are available with SC/APC & LC/APC connectors – factory terminated ensuring the highest possible quality & peace of mind.

RELATED PRODUCTS

Enhance your data center network with Multipath™. Solutions designed for end to end solutions for data centers. Multipath™ is a fully developed, proven and integrated cable management system that eliminates the need to winch in sub-duct. All of our Multipath™ duct meet industry standard BS EN 61386 450N Class.

YOUR FULL SOLUTION PROVIDER

Our solutions are made to perfectly complement your network installations, working together seamlessly for optimal performance.
